Attn: Mr. Matt Lepore, Director
RE: Request to the Director for Exception Location
Proposed Well
Mississippian New Drill
Township 14S, Range 45W, 6th P.M.
Section 11: SESE: 1320' FSL & 975" FEL

Dear Director,

Resource Development Technology, LLC, (RDT) is planning to drill the above mentioned well to the Mississippian Formation.

The proposed surface location is approximately 1005' south of the existing Busby Trust #1 well (API # 05-017-07428). RDT has obtained seismic data that shows the optimum location for the proposed Well is 1005' south of the existing well. RDT respectfully requests that the COGCC grant an exception location based on this geologic data. Anadarko owns an unleased 40% mineral interest in the tract. RDT has a leasehold interest of the remaining 60%. As prescribed by the Colorado Oil and Gas Conservation Commission (COGCC) Rule 318.(c)., RDT has obtained written exception of Rule 318.(a). from the offset Mineral Owner, Anadarko, the owner of the unleased 40% mineral interest, contained in a waiver. A copy of this waiver is attached for your consideration. RDT is Operator of the existing well, and has a wellbore interest of 100% of minerals, which is on the same lease as the proposed well, and there is no objection to the exception location of the proposed well.

Attached is a diagram of the proposed well location and the existing well.

Thank you for your attention to this matter. RDT respectfully requests that the COGCC review the enclosed information and approve the requested exception location waiver and Application for Permit to Drill the captioned well.

If you have any questions or concerns, please do not hesitate to contact me at (303) 716-3200 or by email at karlwalterjr@gmail.com.

Sincerely,

Karl Walter
