SUNDRY NOTICE

Submit a signed original. This form is to be used for general, technical and environmental sundry information. For proposed or completed operations, describe in full in Comments or provide as an attachment. Identify Well by API Number; identify Oil and Gas Location by Location ID Number; identify other Facility by Facility ID Number.

<u>Objective Formation</u>	<u>Formation Code</u>	<u>Spacing Order Number</u>	<u>Unit Acreage</u>	<u>Unit Configuration</u>

OTHER CHANGES

☐ **REMOVE FROM SURFACE BOND** Signed surface use agreement is a required attachment

☐ **CHANGE OF WELL, FACILITY OR OIL & GAS LOCATION NAME OR NUMBER**

From: Name STORY GULCH Number 8505A-24 Effective Date: _____

To: Name _____ Number _____

☐ **ABANDON PERMIT: Permit can only be abandoned if the permitted operation has NOT been conducted. Field inspection will be conducted to verify site status.**

☐ WELL: Abandon Application for Permit-to-Drill (Form2) – Well API Number _____ has not been drilled.

☐ PIT: Abandon Earthen Pit Permit (Form 15) – COGCC Pit Facility ID Number _____ has not been constructed (Permitted and constructed pit requires closure per Rule 905)

☐ CENTRALIZED E&P WASTE MANAGEMENT FACILITY: Abandon Centralized E&P Waste Management Facility Permit (Form 28) – Facility ID Number _____ has not been constructed (Constructed facility requires closure per Rule 908)

OIL & GAS LOCATION ID Number: _____

☐ Abandon Oil & Gas Location Assessment (Form 2A) – Location has not been constructed and site will not be used in the future.

☐ Keep Oil & Gas Location Assessment (Form 2A) active until expiration date. This site will be used in the future.

Surface disturbance from Oil and Gas Operations must be reclaimed per Rule 1003 and Rule 1004.

☐ **REQUEST FOR CONFIDENTIAL STATUS**

☐ **DIGITAL WELL LOG UPLOAD**

☐ **DOCUMENTS SUBMITTED** Purpose of Submission: _____

RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

COMMENTS:

Best Management Practices

<u>No</u>		<u>BMP/COA Type</u>	<u>Description</u>

Operator Comments:

Encana (Nate Denzin) recently discussed the surface casing cement quality on the SG 8505a-24 L24 496 well with the BLM (Bob Hartman, Bud Thompson). This surface cement job requires some form of remediation. To determine what type of remediation is required we proposed to run in the annulus (between the open hole and 95/8" surface casing) with 1.9" tubing rigged up with a 100 ton crane. A mule shoe would initially be made up on the end of the tubing. If we cannot run in the annulus with that string configuration, we will trip out and run back in with a small roller cone bit and use surface tongs to work the tubing in the hole.

Once we are no longer able to run in the hole, we will conduct a conference call with the BLM to discuss remediation procedures. If we are able to run in the hole ~1000', we would be able to top off cement to surface. If we are not able to run in the hole ~1000', perforating and cement squeezes may need to be performed.

Encana will notify the BLM White River Field Office prior to these conducting operations.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

Signed: _____ Print Name: Amy Henline
Title: Permitting Analyst Email: amy.henline@encana.com Date: 7/25/2013

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: ANDREWS, DAVID Date: 8/12/2013

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

	Submit all cement tickets for surface casing, including top-out remedial cement tickets with forthcoming Form 5 (Drilling Completion Report). Submit copy of 6/30/2013 surface casing Cement Isolation Scanner Log with forthcoming Form 5 (Drilling Completion Report).

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Engineer	6/30/2013 Cement Isolation Scanner Log showed little or no cement from 2000' MD to surface. Per Nate Denzin on 8/8/2013: In this well, we were able to run 1.9" tubing to 1,122 feet. We also were able to circulate to hole clean. The preferred remediation for this well is to pump 15.8 ppg (1.16 ft3/sx) to surface from where the tubing is currently landed. Calculated volume would be 660 sacks. If cement is to fall while thickening, we would continue to top off with the same cement grade from surface. Dave Andrews granted approval to proceed via email to Nate Denzin on 8/8/2013.	8/12/2013 2:47:50 PM
Permit	Passes Permitting. Refer to Engineering.	8/12/2013 2:28:23 PM
