Paul,

COGCC has reviewed the 2012 Annual Project Summary for the Wass #5 Remediation Project 4369. Kerr McGee has requested to reduce the monitoring program by removing monitoring wells MW-12, MW-13 and MW-14 from the monitoring program.

COGCC approves the request to reduce monitoring at this time. However, if concentrations in wells at the site appear to increase, particularly at monitoring points MW-06, MW-07 or MW-10, then monitoring wells MW-12, MW-13 and/or MW-14 may be required to be returned to the monitoring program.

Please contact me with any questions regarding this project.

Regards,

Rick Allison, P.G.
