COMMENTS:

Condor would like to request to flare the production from the 7" casing due to the fact that the pipeline has not yet been connected. DCP has obtained permits and right of way to install the pipeline, however, construction has not commenced. The estimated date for the pipeline to be completed is on or about 9/8/2013. The volume that is estimated to be flare is at 400 mcf/day beginning on or about 8/23/2013. The well is not subject to and does not produce any H2S. Please find attached offset well analysis.
