Subject: Oxy Operator 66751 Inspection Doc #663900223

Mike:

For inspection document #663900223 there is a Facilities violation for the 697-18-64B well, API 05-045-15251.

This well was included in a letter from Bob Koehler at the COGCC asking that it be returned to production, MIT'd or P&A'd. We are working with Bob and have provided him with a plan to complete the work by Nov. 2013.

Oxy is therefore requesting that this item be marked as "completed" in your records as it will be handled by Bob Koehler.

If you should have any questions or require additional information, please contact me.

Regards,
