Hi Bob,

Sorry it took a while to round up the picture you were looking for, from when LTE sampled the Markham well (see attachment). Let me know if you have any more questions.

Paul

Becci,

See below from COGCC. Please let me know. Thanks.

Paul – this is what the well water look like when the COGCC sampled. Also has iron at 18 mg/l. Anadarko's sample had Fe at 0.868 mg/l. Looks like very poor quality just due to suspended sediment. Did you have photos taken of the purge for your sampling?

Bob Chesson
