

October 10, 2013

Mr. Alex Fischer
West Environmental Supervisor
Colorado Oil & Gas Conservation Commission
1120 Lincoln Street, Suite 801
Denver, Colorado

**RE: Form 4 – Sundry Notice - Voloshin-Morton 1-8
Source Release Findings Summary & Remedial Action Plan
Spill Tracking Numbers: 2231691 & 2231799**

Dear Mr. Fischer:

On behalf of Peakview Operating, LLC. (Peakview) LT Environmental, Inc. (LTE) is submitting this letter as a notice of updating the remedial activities schedule at the Voloshin-Morton 1-8 (Site). Peakview will begin excavation activities of all observed/identified hydrocarbon impacted soil and removal of contaminated groundwater at the Site as soon as the first 1 to 2 feet of soil is sufficiently frozen as to minimize the surface damage to the adjacent property, pursuant to the formalized access agreement with the adjacent property owner. Excavation activities will be completed no later than November 22, 2013. Excavation and soil sampling will be conducted in accordance with all applicable rules and regulations. Additionally, the removed hydrocarbon impacted soil will be replaced with clean soil from the adjacent field. All excavated soil and recovered groundwater will be disposed of properly.

Please feel free to contact LT Environmental Inc. (970.285.9985) with any questions or concerns associated with schedule.

Sincerely,

LT ENVIRONMENTAL, INC.
