John,

Thank you so much for your call this morning, sorry it has taken me so long to get back to you. To confirm the items we discussed:

- 1) Mutual # 4-30H (05-057-06488)/ ID # 298265: The Mutual #4-30H well has not yet been drilled, EE3 anticipates that we will drill this well in the summer of 2014. This well will be drilled using a closed loop system therefore no pits will be used. COGCC Verify no construction and Change Pit status to closed under old operator.
- 2) Hebron # 1-18H (05-057-06501)/ ID #414127: The Hebron #1-18H was drilled using a closed loop system, any pit applications were for drilling pits. This does not explain the pit outline in aerial image (why would a pit be used if closed loop?). Drilling pit must be closed per 1004. Operator should provide documentation confirming closure of drilling pit.
- 3) Hebron # 5-18H (05-57-06502)/ ID # 414127: The Hebron #5-18H was drilled using a closed loop system, any pit applications were for drilling pits. I'm not sure what this refers to, the pit number is not included in her response.
- 4) Mutual # 2-30H (05-057-06465)/ ID# 295300: The Mutual #2-30H was drilled using a closed loop system, any pit applications were for drilling pits. Operator must provide documentation to close pit.
