15. Comments:

Distance to nearest railroad is greater than one mile. Nearest surface water 175' NE is Box Elder Creek. It was dry upon field observation and will not be disturbed. Location is sensitive due to distance to Box Elder Creek and proximity to domestic well. Nearest water well 965' W is a domestic well; Receipt #0486319, Permit #238708 with an unknown depth and static water level. Water well Permit #44177 used for static water level. Location is a three-well pad consisting of the proposed Marie D04-72-1HN, Marie D04-73-1HN, & Marie D04-74-1HN; multi-well plan attached. Equipment for the proposed wells will be added to existing facilities for the Gittlein D04-24 (API: 05-123-30082) within the pad disturbance. Existing equipment: 1 separator, 1 VOC Combustor, 1 oil tank, 1 gas pipeline, 1 3-phase flowline, 1 EFM, & 1 water vault. Totals with proposed equipment listed in 3.1.

Best Management Practices

No	BMP/COA Type	Description
1	General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each work day. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pickup trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.
2	Storm Water/Erosion Control	Stormwater management plans (SWMP) are in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit No. COR- 038637. BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.
3	Material Handling and Spill Prevention	Spill Prevention Control and Countermeasures (SPCC) plans are in place to address any possible spill associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR 112.
