Jacob,

COGCC has reviewed the Form 19 Spill/Release Report for the Booth USX EE25-02D location submitted by Noble Energy, Inc. on September 11, 2013. Based on the information presented, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water or surface water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. The Spill report #2146071 has been changed to resolved status in the Colorado Oil & Gas Information System.

I left a message on the spill line detailing the spill and also stating that the COGCC was notified. I have not heard back from the CDPHE regarding this spill.

Jacob,

COGCC has assigned spill #2146071 to this release. Has Noble notified CDPHE of a release impacting surface water?
