Jane,

CLC Red W15-09 (not W15-19)

123-16724

Please correct the Scout Card for the above well with the well number of W15-09, not W15-19 which is now present. I have attached the original permit and a Daily Drilling Report from 2010 showing the correct well number and I have verified with our field foreman that the well signs show CLC Red W15-09.

There is no form available in our well file or in your data base requesting a change of well number, and the COGCC Facility Name History only shows W15-19 which we know is incorrect given the attached permit from 1993.

The well number was incorrectly submitted on a change of Transporter, doc# 1174301, page 8, submitted 4/30/2004 by Patina. Somehow it changed the well number in your database to an incorrect number of W15-19.

Please let me know if there is anything I need to do or submit for the correction to be made.

Thanks for your assistance.

Kathleen

I have made the correction in the COGCC database

**Please note that your production people will need to change the well number in their reporting, or they will have an error**

thanks for the heads-up and explanation
