

DRILLING WASTE MANAGEMENT PROGRAM:

Drilling Fluids Disposal:

Closed loop system will be used to separate solids from liquid. Dry cuttings will be stockpiled on location or transported off-site to an approved facility.

Cuttings Disposal:

1. On-site remediation & beneficial re-use
2. Garfield County Landfill in Rifle, Colorado
3. Metcalf Drill Cuttings Facility in Garfield, County (Form 2A Pending Approval, Doc # 400475679)
4. ECDC Environmental, East Carbon, Utah

Solids control equipment consisting of shale shakers, centrifuges, and flocculating unit will be utilized to separate drill cutting solids from liquid (water). Cuttings will be stockpiled on location for beneficial reuse. Any excess cuttings will be transported to commercial facilities at the Garfield County Landfill near Rifle, Colorado, Metcalf Drill Cuttings Facility near Parachute, Colorado or ECDC Environmental near East Carbon, Utah.
