Subject: Baseline Ground Water Sampling Result, Facility ID #752924
Attachments: Lab Report (WPC-292483) 102313.pdf

Arthur,

On November 1, 2013, Toluene was detected at a concentration of 1.3 J ug/L in the baseline ground water sample for Facility ID #752924. This is an estimated value detected below the reporting limit, but above the method detection limit. As we discussed, moving forward, all submitted baseline ground water samples will be analyzed to the reporting limit, and not down to the method detection limit. In the future, all analytical results below the reporting limit will be report as Not Detected. The sampling was performed for Whiting Oil and Gas Corporation on October 23, 2013. I attached the laboratory report for your records. Please let me know if you require any additional information.

Regards,

Jason
