Cc: "Dooling, Jessica" <Jessica\_Dooling@xtoenergy.com>

Amber,

Please enter the attached Form 27 and all other documents (and this email) and link to

Location ID # 335883

Pit Facility ID # 287448

API # 103 10928

Note: I am sending a second email with 4 more docs. to upload.

Thanks,

Jessica,

Consideration has been given to arsenic content. Bottom of pits are within table 910-1 values (or within background values for arsenic), so no more excavation is required on the pits.

Regarding the cuttings, if XTO decides to treat the cuttings onsite, please submit the confirmation results before backfilling the pits. I would like to see if arsenic content and SAR (besides TPH) decrease during the process of mixing/blending.

Thank you,

Carlos
