## OPERATOR COMMENTS AND SUBMITTAL

Comments

Location Assessment already provided.

EE3 requested verbal approval to commence a sidetrack of the horizontal lateral from the COGCC and BLM as shown in the directional plan attached to the request (Sundry Notice) on 14 November 2013. Ensign Rig 12 was on location and was pulling out of the hole to set a kick off plug and sidetrack the horizontal portion of the well at the time of the request. Two issues were encountered that necessitated this change 1) hole conditions deteriorated to point of sticking drilling assembly and 2) geological conditions.

This well is in a Federal Unit and the new trajectory will remain within the hardlines of the Unit. A new Form 2 was submitted to the COGCC on 19 November 2013 for this new trajectory. A Sundry was submitted to the COGCC on 14 November by fax and overnight hard-copy. The BLM approved of the sidetrack 15 November 2013. Verbal approval by David Andrews, COGCC, was made 15 November 2013 at 5:50 PM.

The actual kick off point was at 6,936' KB with a plug set from 7,000'KB to 6,500' KB. The plug consisted of 270 sk CI G 17ppg 1.13 cu ft/sk. Inclination of the vertical hole where the well was kicked off is less than 1 deg. Surface casing (9-5/8" 36# K-55) is set to 1,555' KB and cemented to surface.
