COMMENTS:

Please see the proposed, attached "Receiving Operator Water Reuse Plan" to allow a temporary produced water transfer agreement between WPX Energy Rocky Mountain, LLC (WPX) and Encana Oil & Gas (USA) Inc. (Encana). Encana has a need for up to 200,000 barrels (bbls) of produced water for exploration & production operations in Rio Blanco County, Colorado. WPX operates wells in the Sulphur Creek Field (Ryan Gulch and Ryan Gulch Unit) located in Rio Blanco County, Colorado located near Encana's location currently in need of produced water. WPX is currently sending 6,000-10,000 bbls per day of excess non-tributary produced and flowback water to our approved, existing injection wells for downhole disposal and injection. Encana would like to receive water for beneficial re-use. If permitted to do so, water will be collected at WPX's approved Mautz Ranch Multi-Well Pit (Facility ID 428428, SENW Sec. 19, T2S-R98W, 6th PM) and piped to the Custody Transfer Point in the NWSW of Sec 23, T2S-R99W). Water will be piped to the Custody Transfer Point via WPX's proposed, buried water line. A riser and manifold will be installed in WPX's water line at the Custody Transfer Point, which will accommodate the transfer from WPX's buried water line into Encana's proposed surface line which runs from the Custody Transfer Point to their Left Fork 6502 well pad (COGCC ID 316378, NENW of Sec 23, T2S-R99W). Encana will test and verify compatibility of the produced water provided by WPX Energy. Transfer of produced water would begin upon COGCC and BLM approval and terminate after 180 days with an option for extension. From the custody transfer point, Encana will reuse the transferred water at the following location:
BH DU A11 2100 pad, COGCC ID 425361, NENE Sec 11 T2S, R100W, Rio Blanco County, Colorado.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the

public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public

use: _____
