Subject: Dry Sage winter big game timing stipulation exception

Desa, Shawn,

I have talked with Darby and Bill d. about the request for a one month exception to the Dry Sage 1-23 well pad big game timing stipulation.

Both Darby and Bill expressed concern for truck traffic on HWY 13 and potential for mule deer mortality. However, given Shells change in request to a less intensive (minimal to no truck traffic) activity, CPW would support the one month exception. CPW would expect that only normal maintenance activities (as spelled out in the BLM lease terms and conditions) would occur on the pad site after December 31.

Please let me know if you have questions, would like clarification or need to discuss this further.
