Township 6 North, Range 63 West, 6<sup>th</sup> P.M.  
Section 8: NWSW  
Weld County, Colorado

Dear Director:

The Colorado Oil and Gas Conservation Commission Rule 318A.c. (2) states that, "when an operator is requesting as surface well location greater than fifty (50) from a well (unless safety or mechanical considerations of the well to be twinned or topographical or surface constraints justify a location greater than fifty (50) feet), the operator shall provide a consent to the exception signed by the surface owner on which the well is proposed to be located in order for the Director to approve the well location administratively."

Great Western Operating Company, LLC has evaluated the surface location for the above mentioned wells and determined that it is mechanically difficult for the wells to be drilled near the existing wells within fifty (50) feet of the proposed wells. Great Western Operating Company, LLC respectfully requests that the Director grant approval of the surface location due to the mechanical considerations for these wells.

Respectfully,

A handwritten signature in blue ink that reads "Shannon Hartnett".
