RECLAMATION**INTERIM RECLAMATION**

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

COMMENTS:

It is our intent to place cement in annulars to adequately cover and isolate any productive formations and ground water zones. (Niobrara-Codell formation in this well). This well was previously permitted and completed in the Codell and/or Niobrara formations, and as a result no additional permitting is required for gross perforated interval change. In the process of this operation it is PDC's intent to do some remedial cementing of the production casing. We have consulted the COGCC's engineering manager, Stuart Ellsworth, and prepared a workover procedure intended for this well as follows:

- MIRU
- ND production equipment
- NU BOP
- TIH clean out to PBTD with bit and scraper
- TOOHH laydown bit and scraper, pickup up packer
- TIH and set packer above top of perforations
- Pressure test casing to 5,000 psi (Maximum treating pressure for frac operations)
- TOOHH with packer and laydown.
- ND casing hanger and unseat casing
- TIH (annulus) with 1 1/8" workstring and tag TOC
- Place cement in annulars to adequately cover and isolate any productive formations and ground water zones
- NU casing hanger and reseat casing
- Run new CBL to be submitted to state

In the event the casing does not pressure test, then we will hunt the holes in the casing and repair prior to completeing annular cementing.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million)

Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
