COMMENTS:

Attached is an exhibit that shows the GV 86-2 pad. We have found that the south west corner has a buried power line (purple line) that is further into the pad than we first thought. If we cannot cut this corner then we do not have enough material to get the pad we need.
Our solution is to cut out material that is behind the currently installed production equipment to make up the fill material that we need. This area is indicated in red. (see attached)

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
