Nathan,

For the Bohrer well I count 17 potential water sources in the quarter sections that contact the ½ mile radius and the Sundry accounts for 14. Could you check you information and let me know about the additional information.

For both we need more documentation including which wells you were looked and if the request to sample is rejected. I would recommend a spread sheet that has the receipt or well permit number, how and when the owner was contacted, and what the response was. That way the reviewer can look at our maps and compare potential water sources to the list. I will put these two Sundries on hold until I receive the additional information.

Thanks,

Arthur

Arthur,

Please let me know if the exceptions I sent today did not go through. On the last one it said the document was successful but then it said something about an error.

Thanks,
