COMMENTS:

Due to high production volumes an additional compressor is needed for this facility location. An updated inventory is attached. This addition will not modify the surface disturbance identified on the approved 2A (doc 400162647) but since some reclamation has taken place an as-built drawing and production facility location drawing are attached. The location is in crop land but current pictures could not be taken due to the weather conditions. An aerial photo is attached as a replacement at this time. The soil type is 47 Olney fine sandy loam, 1 to 3 percent slopes.
