Anne,

Please see below for the verbal approval from Diana Burn to P&A the Shafer USX W 35-7. Let me know if you have any questions.

Thanks,

Casey

Subject: Shafer USX W 35-7

Diana,

As per our discussions on 1/3/14 and 1/6/14, due to unsuccessful fishing operations on the Shafer USX W 35-7 (API 05-123-11215) we will pump a cement plug inside the production casing to cover the irretrievable fish and provide isolation. From the top of this cement plug in production casing we will proceed with plugging the well to surface following standard P&A procedure. Please let me know if you need any additional information or have any questions.

Thanks,

Casey
