COMMENTS:

Due to high production volumes an additional compressor is needed for this facility location. An updated inventory is attached. This addition will not modify the surface disturbance identified on the approved 2A (doc 400162647) but since some reclamation has taken place an as-built drawing and production facility location drawing are attached. The location is in crop land but current pictures could not be taken due to the weather conditions. An aerial photo is attached as a replacement at this time. The soil type is 47 Olney fine sandy loam, 1 to 3 percent slopes.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
