**RE: Rule 318A Water Well Sampling
Outstanding Water Well Records
Bayswater Exploration & Production, LLC**

Dear Mr. Chesson,

As required by the Colorado Oil and Gas Commission (COGCC) Rule 318A.e(4), baseline water well sampling is required prior to drilling the first interior infill well or boundary well within a governmental section. The COGCC set forth a Condition of Approval (COA) on the drilling permits for each well on the enclosed sheet, requiring Bayswater Exploration & Production, LLC (Bayswater) to conduct baseline water sampling before drilling operations proceed.

However, the wells on the enclosed sheet are not the first wells with a 318A.e. COA assigned to them within the respective governmental sections. Some of the wells have not been drilled as indicated in the "Spud_Date" column. As a result, on behalf of Bayswater, Petroleum Field Services is requesting a determination of NOT REQUIRED under Rule 318A.e.(4)D. for the required baseline sampling due to the fact that no water wells were found that meet the criteria of Rule 318A.e.(4) sections A-C.

If you agree to this request, please sign and date the bottom of this letter and return it to me in the self-addressed stamped envelope provided herein.

Please contact me at 303-928-7128 if you have any questions regarding this request. Thank you.

Sincerely,

Nicholas Cocina
Water Sampling Manager
Petroleum Field Services
