Cynthia,

Please note Dirk Sutphin's comments, as he will want an As Plugged WBD, which is attached.

Thanks,
Al

Al,
This is acceptable. I will make a note to the file so when we receive the Form 6-sra that we will not have a problem with it.

Thank you for contacting me,

Dirk Sutphin, P.E.

Dirk,

We have had a rig on this well for five days going on six today, and from all indications the hole has collapsed and we have sidetracked. We have reached a depth of 845', drilling hard sand and shale. Our plan now is to set a cement plug from 845' to surface, in two stages, which will isolate all fresh water zones.

If you have any questions or concerns, please let me know. The revised proposed WBD is attached.
