General Comments**User Group****Comment****Comment Date**

Engineer	Operator replied: After discussions with Jim Chonka and an economic evaluation on the referenced well, we have decided to proceed with plugging this well. The plugging application will be submitted within the week. Operator replied: To follow up with my previous email and in response to your questions: the well does have a packer in place, the well is closed to the atmosphere by a wellhead assembly, and the production decline is the reason for shutting the well in. The mechanical integrity is unknown at this time.	1/21/2014 1:03:07 PM
Engineer	emailed operator JIMWIEGER@qwestoffice.net 1/16/14. Considering condition of approval to pass an MIT within 30 days. Asked operator: Do you have any reason to suspect a well integrity issue? Is there or was there a packer in the well? How is the well closed to the atmosphere?	1/17/2014 3:14:38 PM
