Melissa,

It was great speaking to you this morning. The following sets out the points in our discussion:

- Waste Management Plan for Onsite Washington County acceptable.
- You will review the reference photos with your reclamation group to decide if a COA will be included in the permit to submit new photos; however, please do take a look at the reference photos for the Craig 18-E Facility...the horizon shows where the blonde ground cover turns into the sagebrush.
- We understand that the COGCC considers the abandoned farmhouse a building unit, therefore, we accept changing the distance to 642'.
- Drilling Waste Management section: please add the following language to comments: this waste facility is for the Craig 32-17 well.
- Form 15 Pit Permit: please add the following language to comments: this Pit Permit will be used in compliance with the definition of Production Pit and shall be used no more than three (3) years or less.

Please advise if we are in agreement. Many thanks for your guidance.

Respectfully,

Ann Stephens
