John, That is correct, the investigations may proceed under the approved Form 27s. We are still scheduled to meet with you at the COGCC office on March 5th at 9:00. In the meantime, I'm glad to answer questions about the assessments and corrective actions. I am available this week if you would like to discuss potential site visits.

Thank you.

John Noto

John, thanks... so we assume that we have official approval to proceed with both investigations. We are scheduled for an internal discussion later this week as of your email today. It is a planning meeting so we can proceed forward. I am sure one item/question will be when we can visit the locations with you. Any ideas of your schedule?

Please let us know if we need anything from your side. Thanks again.

Subject: RE: S.J. Warren skim pit assessment and remediation workplan (NOAV 200390941, Complaint #200390928), (From February 10, 2014 email)

James and John,

As a follow-up to recent emails regarding approvals. This is a re-send of the approval email for the SJ Warren Form 27 that was originally sent on February 10, 2014. CM Productions has addressed Item #1, by submitting a signature on the Form 27. Thank you.

James,

COGCC has assigned REM# 8179 and Document # 2147593 to the SJ Warren skim pit assessment and remediation. Please refer to these numbers in future correspondence.

COGCC approves the Form 27 with the following conditions;

1. The Form 27 was submitted without a signature, please sign the attached form and return it to me via email.
2. Notify, COGCC NE EPS, John Noto, 24 hours prior to commencing excavation activities.
3. Soil sampling results must be submitted to COGCC for approval prior to backfilling the excavation.
4. Provide the following items to COGCC to document the remediation; an analytical summary sheet/table comparing soil confirmation sample results to Table 910-1 Standards, a sample location diagram with the final excavation dimensions, the full laboratory analytical report, volume of soil excavated for disposal or treatment, and waste transportation documentation per Rule 907 (if applicable).
5. Submit land treatment plans to COGCC (if applicable) to determine if a Form 27 is required per Rule 907.e.(2).

Please feel free to contact me with questions or concerns.
