Request for Approval to Re-Enter and Re-Plug  
Township 9N, Range 58W  
Section 1: SENE, NWNE  
Weld County, CO

Dear Colby and Sandra Van Cleave,

On June 20, 2013, the Colorado Oil and Gas Conservation Commission (COGCC) enacted a new policy requiring that all operators of horizontal wells completed in the Niobrara Shale formation (the "Formation") to review the completion records for any well that penetrated the Formation that is located within fifteen hundred feet (1,500') of the anticipated bore hole of any such horizontal well.

In accordance with this COGCC policy Noble has evaluated the above captioned well(s) and has determined that it is necessary to re-enter and re-plug the well(s) in order to be adequately isolated from horizontal wells.

As such, Noble requests that you, the surface owner of the lands described above, grant Noble permission to re-enter and re-plug the well(s) by signing below.

Thank you for your cooperation in this matter.

Sincerely,

**NOBLE ENERGY, INC.**
