

**SOW:**  
- Purge pipelines with nitrogen  
- Isolate and blind off the pipelines at the 24-4 station and label as OOS – ABN  
- Remove valve can and valves located ~100' east of CR 213  
- Expose pipes on discharge (~30' from edge of the river), cut and cap pipe below grade, and remove exposed pipe for a distance so as to not be affected by river back erosion.  
NOTE: Hand digging will be used near the river  
- Backfill excavations and compact  
- Reseed disturbed areas
