The SHL has been updated to reflect the "as-drilled" location. The proposed BHL has not changed from the original permit, however the mineral lease information has been updated. There have been no changes to proposed TD. Please note: conductor was set on the subject well on 4/24/2008, casing tab has been updated with actual conductor information. Hole cover is in place. There have been no changes to land use, well construction or the lease. This Refile Form 2 does not require a Form 2A because the pad has been constructed, a closed loop system is being used so no pits need to be constructed, the refiled well will not require any expansion /additional surface disturbance of the pad. The location is not in a wildlife restricted surface occupancy area (RSO); consultation with CDOW is not required and the location does not require a variance from any of the rules listed in Rule 306.d.(1).(A).(ii).; consultation with CDPHE is not required.

This APD is being submitted in lieu of a Form 10 – Change of Operator, per COGCC request (see notes below). Ursa requests that upon approval of this APD, Antero be released of any bond obligations related to this API number. Please note the following information:

- Ursa Operating Company (Ursa) acquired assets from Antero Resources in December 2012 under a Purchase and Sale Agreement, and assumed full operational responsibility on April 1, 2013.
- On June 5, 2013 (via e-mail), COGCC requested that Antero submit Form 4 Sundries to abandon the locations (e.g. well permits) for approximately 84 permits in lieu of a Form 10 to transfer the expired well permits; and that Ursa then refile APD's in the future and utilize the same API#s.
- The well pad for this location has already been constructed, and conductor set for this well. Therefore, Ursa is voluntarily submitting APDs for this well to complete transfer of ownership.
