**GROUND WATER SAMPLING**

Uses of Ground Water Sampling Section

Request an Exception to Ground Water Sampling Requirements in Greater Wattenberg Area Rule 318A.e(4) or in Statewide Rule 609.c. Request a Previously Sampled Water Source in the COGIS database be used to meet sampling requirements as described in Rule 609.d. (3).

**NOTE: If this Sundry Notice is being submitted to request a Ground Water Sampling Exception it cannot be used for any other purpose except requesting the use of a Previously Sampled Water Source in the COGIS database.**

- ☐ Request an Exception to Ground Water Sampling Requirements per Greater Wattenberg Area Rule 318A.e(4): There are no Available Water Sources located within the governmental quarter section or within a previously unsampled governmental quarter section within a ½-mile radius of this proposed Oil and Gas Well, Multi-Well Site, or Dedicated Injection Well.
- ☒ Request an Exception to Ground Water Sampling Requirements per Statewide Rule 609.c.
- 14 Number of Water Sources located within one-half (1/2) mile of a proposed Oil and Gas Well, Multi-Well Site, or Dedicated Injection Well.
- 1 Number of Water Source Exceptions requested per Rule 609.c.
- 7 Number of Water Sources determined to be unsuitable. **The condition of these Water Sources MUST be documented in the comments below or in an attachment.**
- 4 Number of Water Sources suitable for testing whose owners refused to grant access despite an operator's reasonable good faith efforts to obtain consent to conduct sampling.  
**The reasonable good faith efforts used to obtain access from the owners of these Water Sources MUST be documented in the comments below or in an attachment.**
- ☐ Request a Previously Sampled Water Source in the COGIS database be used to meet sampling requirements as described in Rule 609.d(3)

\_\_\_\_\_ Type of Sample Substitution Request

Enter Sample ID Number from COGIS Maps for each Previous Water Sample:

| Sample ID | Facility ID | Sample Date | Sample Purpose |
|-----------|-------------|-------------|----------------|
|           |             |             |                |
|           |             |             |                |
|           |             |             |                |
|           |             |             |                |
|           |             |             |                |

**COMMENTS**

There are 14 water wells located within a quarter mile radius of the proposed drilling location. Of these water wells, 4 of their owners denied access for baseline water sampling. One water well was determined unsuitable/un-operationable. Three of the eight water wells were suitable for testing. However, two of the water wells were sampled per rule 609 because the third water well was located further away from the proposed drilling area.

**Operator Comments:**

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.

| Environmental            | The operator has addressed all the potential water sources within 1/2 mile of the oil/gas well.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 5/12/2014<br>11:57:27 AM   |
| Environmental Data       | Spoke B.Forkner at LT regarding the Sundry. There are four wells owners that were not sent access requests. LT is now trying to gain access to the wells in question even though the well has been spud. The sundry will be kept on hold until I receive information regarding the additional wells.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 2/7/2014 9:40:25<br>AM     |
| Environmental Data       | Additional information is required from the operator. email sent on 2/5/2014.<br><br>On the Sundry notice that was submitted shows 8 wells in ¼ mile. This does not meet the requirements of Rule 609. Rule 609 states that :<br><br>Sampling locations. Initial baseline samples and subsequent monitoring samples shall be collected from all Available Water Sources, up to a maximum of four (4), within a one-half (1/2) mile radius of a proposed Oil and Gas Well, Multi-Well Site, or Dedicated Injection Well.<br><br>Based on my review I came up with fourteen wells that could be potential water sources. Please provide documentation that shows why each well was not sampled. I suggest a spreadsheet that has the DWR receipt number, DWR permit number, method used to try and gain access for sampling ( phone, certified letter), date the attempt was made and the reason that well was not sampled. | 2/5/2014 2:12:38<br>PM     |
