Ritchie Exploration LLC, State 1-12 Lease, API #05-11506040, Remediation #8108

Dave,

Thank you for providing the thorough and detailed Reclamation Report for the State 1-12 lease. Based on a review of the data, COGCC concurs that no further action is necessary for the removal and restoration at the site.

COGCC also concurs that the soil with SAR and pH above Table 910-1 standards is not likely to impact future vegetation after being covered with least three feet of clean fill material (as described in the Final Site Reclamation Report). However, additional work could be necessary if impacted soil or groundwater are present in the future. Additionally, if re-vegetation is not sufficient to meet COGCC rules, additional remediation will be required.

Upon completion of reclamation, operator shall remove all materials used for storm water control and fencing and properly recycle or dispose. Submit a Sundry Notice Form 4 requesting a Final Reclamation Inspection when the final reclamation threshold has been satisfied in accordance with COGCC Rule 1004. The remediation number and associated Form 27 will be closed for this case after the site has passed the final reclamation inspection.

Feel free to call or email if you have questions or concerns.

Thank you,

John Noto
