COMMENTS:

Request to complete per Mamm Creek Field Notice to Operators. The referenced well has been successfully cemented. The cement top according to the CBL is 1420'. Cement was actually circulated to surface during the production cement job. The bond log shows good cement to the above indicated depth. Piceance Energy, LLC requests approval to commence completion operations. Planned completion date is 6/9/2014. Attachments include: CBL, As-built wellbore schematic, temperature survey, bradenhead pressure summary.

Engineer	What CBL is the operator looking at for a TOC of 1420'? could THAT CBL be furnished to COGCC? -- because the CBL in the well-files does not show a 'good' TOC above 4000', and difficult to determine below that depth. The bond begins to look good below 6000'.	5/16/2014 3:37:01 PM
