To: Regulatory members &lt;regulatory@petro-fs.com&gt;

Ann,

I have reviewed the referenced Form 2A Oil and Gas Location Assessment and have the following comments.

1) A review of your Location Drawing indicates the disturbed area will overlap across the irrigation ditches located 315 feet and 316 feet southwest. Therefore, I would like to add the following Condition of Approval to protect them:  
"Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to protect the irrigation ditches located 315 feet and 316 feet southwest of the oil and gas location from a release of drilling, completion, produced fluids, and chemical products."

2) Scott Ballstadt with the Town of Windsor has added a comment to this Form 2A indicating the subject property is located within the Town's Growth Management Area and requests that a comprehensive Drilling and Site Improvement Plans be submitted for their review and approval.

Are you aware of this comment from the Town of Windsor and is Extraction working with Windsor in the development of this oil and gas location?

Please respond to this correspondence by June 20, 2014. If you have any questions, please feel free to contact me. Thank you.

—

Hi Doug,

In response to your items below:

1. Operator agrees to the COA re: protection of the two ditches within the disturbed area.
2. Yes, Operator is in contact with the Town of Windsor re: their required CUG permit and are in continuing conversations with Scott Ballstadt.

Thank you for your guidance, Doug. Please advise if I may be of further assistance.

Respectfully,

**Ann Stephens**
