Form 27 #2090014 Conditions of Approval

Dave,

COGCC has assigned Remediation # 8253 and Document # 2090014 to the Form 27 for skim pit removal at the Walters #1 lease. Please reference these numbers in future correspondence. The form is approved with the following conditions:

Although the reported concentrations in a sample from the skim pit excavation were below COGCC Table 910-1 standards, additional remediation and confirmation sampling will be required if there is any remaining oily soil or if the pit was not closed in accordance with other COGCC 900 Series Rules. Provide a drawing that shows an outline of the excavation with approximate dimensions and depths. Provide disposal documentation.

A copy of the signed form is attached for your records. Feel free to call or email if you have questions or concerns.

Thank you,

John Noto

Cc: Remediation #8253
