Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During P&A activities associated with this wellhead, soils were excavated to cut off and seal the well casing below ground. A sample was collected of the excavated soil and sent for testing. TPH levels in the soil from preliminary lab results were approximately 3,840 mg/kg. The soils have been placed on a liner and will be transported off site for disposal. Final soil testing results not yet available from lab.
