Kate,

I have reviewed the referenced Form 2A Oil and Gas Location Assessments and have the following comments.

- 1) Per COGCC Rule 303.b.(3)C, a description of all oil, gas, and/or water pipelines that will be on the location must be included on the Form 2A. Please provide me that description. It can be as simple as the number, size, and material of each pipeline, buried or above ground, pressurized or not.
- 2) In the Cultural Distance section you have indicated the nearest Building and Building Unit is 2,132 feet from this proposed oil and gas location. This appears to be structures associated with EOG's Beartooth Gas Processing Plant to the west of this proposed oil and gas location. When completing the Cultural Distance section, we would like operators to not use structures associated with oil and gas operations. During my review, the nearest Building and Building Unit I was able to identify is located 4,350 feet from the proposed oil and gas location. Therefore, I will change the distance to the nearest Building and Building Unit from 2,132 feet to 4,350 feet.
- 3) In the Water Resources section you have indicated the estimated depth to groundwater is 143 feet and comes from water well permit #16730-F. A review of this water well permit indicates 143 feet is the total depth of that well and the static water level is 68 feet. This matches what was indicated on the original Form 2A; therefore, I will change this Refile Form 2A to reflect that.

Please respond to this correspondence by July 24, 2014. If you have any questions, please feel free to contact me.

-

Doug,

Thank you. Please find our responses below.

1). EOG typically installs a 3" buried welded steel line from the wellhead to the treater. From the treater to the tanks, EOG typically installs 1-3" welded steel oil line, and 1-3" buried welded water line. Additionally, EOG typically installs 1-3" gas line moving the gas off pad to sales.

2). EOG agrees with the distance to the nearest building change to 4,350'.

3). EOG agrees with the depth to groundwater change to 68'.

Thank you, and please contact me if you need any additional information.
