As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

At 7:30am, on 6/28/14, a produced water release was discovered at Oxy's Central Water Handling Facility. The release was discovered within an unlined valve can as produced water spilled from a corrosion related failure of a 6" water gathering line. The line was isolated to prevent further spillage. The free liquid was removed from the valve can via vac truck. The remaining impacted soil is being excavated and segregated for disposal. The release was limited to the boundaries of the facilities and no waters were impacted.
