

COGCC – Requested Change in Location for the Permitted Location ID #435249.

RE: API# 05-123-38533 and Location ID# 435249.

NGL requests with this submitted Form 4:

1. Name Change from Circle B. Williams SWD #5-61-27 to NGL C11.
2. Request to deepen from permitted 8,500' to new depth of 9,500'. Bob Koehler specifically stated that he is OK with deepening via a Sundry. I will supply to Bob the new Formation Data.
3. Request shift of Permitted Location ID# 435249 due to poor original design for Truck access to the Original Facility Layout. See attached Location Drawing and Proposed Scaled Facility Drawing.

The Original Location: 632' FSL, 1146' FEL, SESE Sec. 27-T5N-R61W

Requested New Location: 380' FSL, 817' FEL, SESE Sec. 27-T5N-R61W

This would be a 402' move of the SHL to the SE and a shift of the associated location to accommodate the SHL shift. Distances to all cultural items are still over the minimums.

Attachments to this Form 4:

1. Well Location Certificate.
2. Location Drawing.
3. Proposed Scaled Facility Drawing.
4. Property Line Setback Waiver Letter to the Director.
5. Surface Use Agreement: Bill Barrett & NGL Water Solutions.
