Ken, Ryan, and Mark

COGCC has assigned spill tracking #400639217 to this release. I inspected the location yesterday afternoon. Additional excavation was required to remove impact soil above the ground water. Ground water has been impacted and will require post-excavation monitoring, at a minimum. However, since the source has been controlled and is being removed, I don't think the impacted ground water will extend very far beyond the tank battery footprint, but Bonanza Creek will submit an assessment report with analytical data for COGCC review.

You can access the spill documents on the COGCC website. Click on the blue hyperlink below and then click on documents. Feel free to contact me with any questions.

Thanks Rick,

I have attached Ryan Lane and Mark Leslie to this email as they are the property management folks for CPW in this area. If you can keep them informed as well that would be helpful

Ken,

I just received word that line locates have been completed and Bonanza Creek will begin excavation at this site today. COGCC will continue to keep you updated. If someone else needs the information let me know.

Regards,

Rick Allison, P.G.

Ken,

Bonanza Creek has confirmed this release to COGCC. They have informed me that all pooled fluids have been removed and excavation will begin early next week. Bonanza Creek will be required to submit documentation for the extent of impact and for the removal of impact, including soil sample analytical results. If ground water impacts are discovered, Bonanza Creek will be required to submit a remediation plan to address those impacts.

As soon as we assign a spill tracking number for this release, I can point you to that information.

As things progress, we will keep you informed.

You can contact me directly with any questions regarding this release.

Regards,

Rick Allison, P.G.

Attached is a report for Weld County of a release of crude oil on the Centennial State Wildlife Area east of Greeley. Some CPW personnel are concerned that the oil may travel quickly through the sandy soil to groundwater.

Thank you,
Ann
