Mr. Lepore:

Bonanza Creek Energy, Inc. ("Bonanza") intends to drill the above referenced horizontal oil and gas wells to the Niobrara or Codell Formations, from a well pad to be located as described above. The referenced planned wells and Production Facilities are located within the Buffer Zone Setback (500'-1000') of several building units.

Pursuant to COGCC Rule 305.a, the Surface Owner and Building Unit Owners within the Buffer Zone Setback were sent Notices of Intent to Conduct Oil and Gas Operations on the subject location, on January 29, 2014. The table included on the following page summarizes the Notices Sent, resulting waivers, and consultation notes. The referenced notices were sent via certified mail and copies maintained in Bonanza's files. Additionally, any waivers or consultation requests signed and returned are maintained in Bonanza's files.

Pursuant to Rule 306.e, Bonanza consulted with the building unit owners who did not waive the consultation. As a result of the consultations with Buffer Zone Building Unit Owners, 32' high sound walls will be installed along the West, North, and East perimeter of the drilling location. Additionally, 16' high acoustical panels will be set along the West, North, and East perimeter of the mud pumps/boiler area. Site lighting will be pointed downward and inward to avoid glare on the building units and roads.

Bonanza respectfully requests COGCC review the enclosed information and approve the associated OGLA Form 2A and APDs.

Sincerely,
BONANZA CREEK ENERGY, INC.
BONANZA CREEK ENERGY OPERATING COMPANY, LLC.
