SPILL/RELEASE REPORT (INITIAL)

This form is to be submitted by the party responsible for the oil and gas spill or release. Any spill or release which may impact waters of the State must be reported as soon as practicable; any spill over 20 bbls must be reported within 24 hours and all spills over five bbls must be reported within ten days. Submit a Site Investigation and Remediation Workplan (Form 27) when requested by the Director.

Fluid(s) Spilled/Released (please answer Yes/No):

Was one (1) barrel or more spilled outside of berms or secondary containment? Yes

Secondary containment, including walls & floor regardless of construction material, must be sufficiently impervious to contain any discharge from primary containment until cleanup occurs.

Were Five (5) barrels or more spilled? Yes

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On July 20, 2014, during completion activities on the Kodak #12 well, a pressurized fitting on the well failed resulting in a release of approximately 215 bbls of flow back fluid onto the well pad surface. After the well depressurized, a new fitting and valve were installed to stop the release. Vacuum trucks were used to recover approximately 165 bbls of fluid that was pooled on location. The fluid was transported to a licensed facility for disposal. Pending initial soil analytical results, the impacted soil will be excavated and hauled to a licensed disposal facility. Confirmation soil samples will be collected from the excavation. A topographic Site Location Map showing the general location of the release is attached as Figure 1. The analytical results and excavation details will be provided in a supplemental report.
