Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During plug and abandonment operations at the UPRR 22 Pan Am "G" #1 well, approximately 5 bbls of water-based fluids used in the plug and abandonment process surfaced off the well pad. A vacuum truck was utilized to recover approximately 4 bbls of the released fluid. The impacted soil will be excavated and hauled to a licensed disposal facility. Confirmation soil samples will be collected from the excavation. The excavation will be backfilled with clean fill soil. A topographic Site Location Map showing the general location of the release is attached as Figure 1. The analytical results and excavation details will be provided in a supplemental report.
