## COMMENTS:

The attached documents have been submitted for COGCC review and approval to allow a temporary produced water transfer between WPX Energy Rocky mountain LLC (WPX) and OXY USA WTP LP (Oxy). WPX has a need for up to 60,000 bbls of produced water for completion operations in Garfield County, Colorado. WPX would like to transfer produced water from Oxy for beneficial re-use. If permitted to do so, water will be transferred from Oxy's Pond G (Facility ID 414402, SENW, Section 16, T6S, R97W, 6thPM) to WPX's frac tanks located at the TR 24-28-597 (Facility ID 335925, SESW 28 5S 97W) via existing water transfer lines operated by WPX and Oxy. The transferring company (Oxy) shall maintain all regulatory responsibility, custody and control for all water until such time it is transferred into WPX's existing water lines. This transfer will occur via pipeline risers in both water lines located within the pipelines' right-of-way (custody transfer point). Exact location of the custody transfer point is Lat. 39.541631/Long.-108.231430, located on Oxy property. Once water reaches the custody transfer point and has been transferred into WPX's water distribution pipeline, the receiving company will assume all regulatory responsibility, custody, and control of the water (see attached map for additional detail on the custody transfer point). Transfer of produced water would begin upon COGCC approval and terminate within 90 days with an option for extension.

## H2S REPORTING
