COMMENTS:

WPX Energy requests permission to vent bradenhead pressure. 48 hours after cementing the bradenhead pressure was 140 psi.

On Monday, August 11, 2014, COGCC gave WPX verbal approval to vent through a hard line to a tank. An email exchange between Jennifer Schrant, WPX EDP Engineer I and Jay Krabacher, COGCC Engineer granted WPX permission to vent.

Based on the information provided herein, this Sundry Notice (Form 4) complies with COGCC Rules and applicable orders and is hereby approved.

COGCC Approved: KRABACHER, JAY Date: 8/11/2014

CONDITIONS OF APPROVAL, IF ANY:**COA Type****Description**

	Vent through a hard line to a tank. As you know, the BHP readings at specified time intervals after cementing are to be reported when WPX submits the Request-to-Complete Sundry. In this case, a summary of this situation should also be included. During this venting, note the BHP at 72 hours after cementing (if that interval hasn't already occurred) and at 24-hour intervals thereafter. Call to discuss this well when the time to complete is on the immediate horizon.
