Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On August 17th, at approximately 3:30 PM, the lease operator at Encana's Peppler Farms NWNE Battery was draining water off the bottom of the tanks into the water pits but forgot to close the valves before he left. While he was at the next site the automated emergency shutdown (ESD) alerted him of the issue. He rushed back to the site, but not before the water pits had overflowed into the lined secondary containment. He immediately shut in the wells, called a vacuum truck, and alerted on-call.
