COMMENTS:

VAL Energy, Inc. requests to change the BOP equipment from a 3M Double Ram and Annular system, to a 2M Annular BOP only system. This change is requested due to the maximum bottom hole pressure anticipated, only being 1600 psi. Murfin Drilling Company, Rig #22 does not provide enough clearance height under the substructure to accommodate a 3M Double Ram and Annular system. Local BOP rental companies report they cannot supply the stack height required to meet the BLM specified valving, manifold, and accumulator configuration for a 3M BOP system. Therefore, due to the low bottom hole pressure projected in the drilling plan, the drilling rig configuration, and lack of equipment to meet BLM specifications, VAL feels a 2M Annular system will provide adequate protection for the drilling of this well. BLM granted approval of this change on 8/12/14.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
