Larry,

I have reviewed the referenced Form 2A Oil and Gas Location Assessment and have the following comments.

- 1) When you have submitted the Form 2A for the Cottonwood 08 Production Pad, please let me know and I will add that Document # to the Related Remote Locations section of the Form 2A.
- 2) It appears that a portion of this proposed oil and gas location will be on lands with a slope of 10% or greater. Therefore, per COGCC Rule 303.b.(3)I, please provide me with a Construction Layout Drawing that also includes a location cross section plot.
- 3) Per COGCC Rule 303.b.(3)F, the Access Road Map shall show the access road from the highway or county road to the proposed oil and gas location. Your Access Road Map does not show the access road as it comes off a highway or County Road. Please send me a revised Access Road Map that shows this.

Please respond to this correspondence by October 23, 2014. If you have any questions, please contact me. Thank you.

Is approval of this 2A dependent on submittal of Cottonwood 8 Production Pad 2A?

Larry,

Yes, we don't approve a well pad if their is no location for the wells to produce to.

As per our conversation I would like to make the following revisions.

The production facilities for the initial well will be on the drill location. This well will be drilled, completed, produced and evaluated prior to drilling of additional wells in this section. The site will have 1 Well, 1 Pumpjack, 2 Oil Tanks, 1 Separator, 1 VOC combustor, 1 Water tank and 1 Flare.

If and when application is made for additional drilling from this location, a 2A for remote facilities will be submitted in conjunction with the applications.

Larry,

Based on this, is it Whiting's intentions to remove this production equipment once the remote Cottonwood 08 Production Pad is permitted? If yes, I would like to add a COA to this permit stating that a Form 4 Sundry shall be submitted for this location to remove the production equipment in conjunction with submittal of the Cottonwood 08 Production Pad 2A.
